SKILLS

- ❖ **Python** - Proficient in Python, with experience in developing robust applications and automating tasks using clean, efficient code.
Skilled in data analysis using Pandas and NumPy within Jupyter Notebook, enabling effective data manipulation, visualization, and interpretation.
- ❖ **HTML** - skilled in utilizing HTML elements and attributes to structure content effectively, enhancing website accessibility and SEO performance.
- ❖ **CSS** - Expertise in CSS3, including Flexbox and Grid Layout, to create visually appealing and responsive web designs that adapt seamlessly to various devices and screen sizes.
- ❖ **Java script** - Skilled in utilizing JavaScript libraries and APIs to enhance functionality, manage asynchronous operations, and ensure seamless user interactions across web platforms.

EDUCATION

- ❖ Bachelors in Computer Science | Royal College, Mira Road, Thane- 401107
- ❖ XII (HSC) | Andrews College, Bandra, Mumbai- 400050

ACADEMIC PROJECTS

❖ Face Recognition Based Attendance System

The primary purpose of the Face Recognition Based Attendance Management System (FAMS) is to revolutionize and optimize the process of attendance tracking within organizations. By harnessing the capabilities of facial recognition technology, FAMS aims to provide a sophisticated, accurate, and efficient solution for recording and managing attendance.

❖ Portfolio Website

Provides a platform to display my best work, whether it's design projects, writing samples, photographs, or case studies. This helps potential clients or employers see my skills and capabilities. It acts as a digital business card, offering a more detailed and engaging representation of my skills, experience, and personality.
